

ZylianT™ Quick Start for Staff

Last updated April 15, 2024

ZylianT™ is a neurohealth screening tool for adults of any age who are interested in resilient aging. ZylianT™ allows many participants to be quickly screened for possible cognitive impairment using a unique combination of 1) patient reported outcomes, 2) visual assessments, 3) recorded speech, and 4) a movement test.

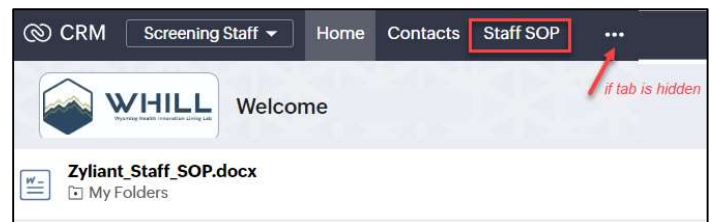

Confirm the Equipment

- High speed WiFi
- iPad (at least 13") with these apps loaded:
 - Canary Speech
 - browser
 - stopwatch
- iPad stand and stylus
- A different tablet or laptop for the administrator to use
- A chair, tape measure, and blue marking tape for the movement test
- A table and 2 chairs (for the participant and administrator)
- Extra reading glasses are helpful
- A quiet area to complete the assessments. Loud, distinct voices could impact the voice recording.

- Enter in the **code** provided by your manager
- **Check your email to attain the username, password, and CRM link to continue**

Using the "Next Steps" email you received

- Open the [WHILL CRM](#) using the username/password from the email.
